ZIRMED®
INNOVATING CONNECTED HEALTHCARE

ZirMed® VeraFund

Part of ZirMed's comprehensive revenue cycle management solution for healthcare

In today's cost-pressured healthcare environment, you can no longer afford to spend hundreds of hours a month processing paper checks from payers. At ZirMed we know that the less time and money you spend collecting and processing revenue, the more stable and successful your organization will be. That's why we created the VeraFund.

VeraFund from ZirMed is unlike any other revenue cycle automation service available. Designed specifically to reduce the time, effort, and errors associated with paper check payments from payers, VeraFund is the first service to fully automate this previously tedious and error-prone process. From receiving, opening, and processing paper checks to posting and reconciling payments, VeraFund saves you time and money.

Benefits

- Takes digital images and indexes all checks and documents.
- Electronically deposits payments into your accounts in less than two business days.
- Converts paper remittance advices into electronic transactions.
- Automatically reconciles claims, deposits, and remittances for payer payments.

VeraFund is the fastest, easiest, and most accurate way to manage paper-based payments. Its three-step process saves hundreds of hours and thousands of dollars every month by eliminating manual processes and errors:

> "VeraFund lets us focus on value-added work for our clients, and allows us to redeploy staff in a more leveraged manner."
>
> – Carrie Moneymaker
> Operations Manager
> Medical Management Professionals, Inc.

1. DIGITIZE DEPOSITS

- Route mail from payers to dedicated digital lockbox.
- Image and index all correspondence, checks, statement stubs, and remittance advices.
- Transform checks into ACH transactions and deposit into bank accounts.

2. CONVERT AND MAP

- Convert paper remittance advices into electronic transactions (835s).
- Match newly-digital ERAs and payments to deposits and claims for payer payments.

3. AUTOMATE WORKFLOWS

- Obtain posted files for payer payments to import into HIS or PM.
- Automatically reconcile and post payments.
- Use quick search for individual ERA, deposit, and date.
