

ZIRMED® CHARGE INTEGRITY SOLUTION

Hospitals on average lose an estimated 1% of revenue each year due to charge capture leakage.

Our proven predictive analytics uncovers millions in recoverable net revenue.

ZirMed's Charge Integrity solution typically delivers a 4 to 1 return on investment for hospitals and health systems.

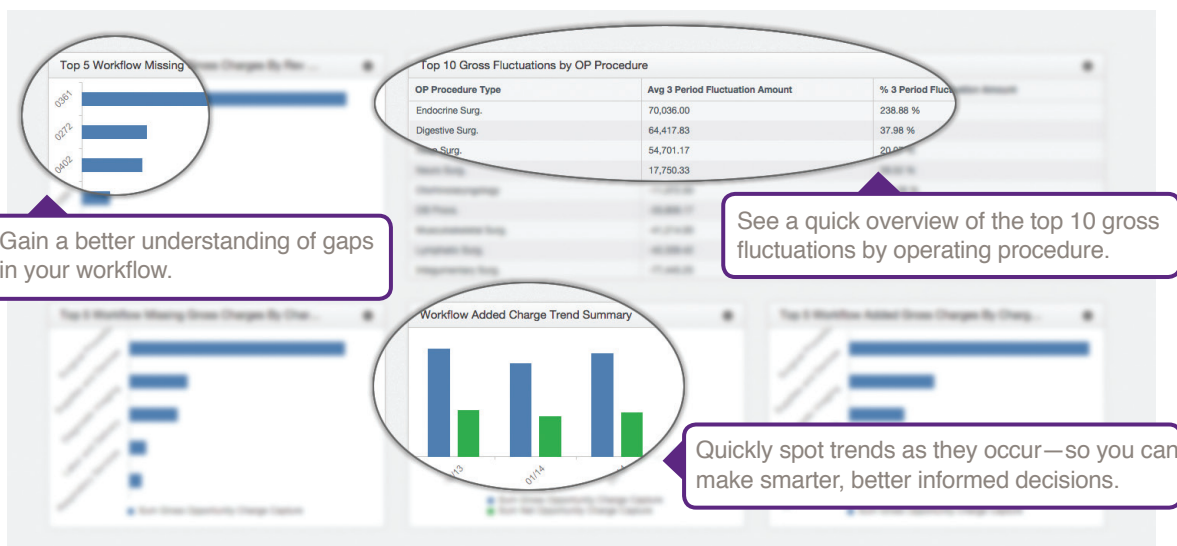

ZirMed's predictive analytics automatically uncovers reimbursable missed charges, coding variances, and overcharges across your entire health system—and continues to refine and optimize charge integrity as your organization grows, changes, and adapts to industry and regulatory shifts. Advanced statistics and data mining algorithms continuously learn new charging practices specific to your hospital and health system by taking into account physician charging and coding processes, patient demography, chargemaster structure, reimbursement terms, and thousands of other key data attributes.

In addition to uncovering hidden pockets of recoverable net revenue, ZirMed's Charge Integrity solution resolves process inefficiencies, improves coding compliance, and ensures the integrity of all inpatient and outpatient claims—in one easy-to-use cloud-based solution. No new hardware or installed software and no in-house IT support or maintenance needed.

Historical claims within timely filing and daily claims inflow are flagged, reviewed, and validated by ZirMed's clinical auditing experts and populated into the customized workflow to keep your revenue integrity staff focused on the most impactful claims.

Intelligent Coding & Charge Capture:

- **Identifies missing charges and coding variances across all patient types**
- **Integrates payer rates** to prioritize efforts on net revenue
- **Mitigates audit risk** from potential overcharging errors
- **Integrates AMA and CMS** coding guidelines
- **Provides comprehensive dashboards and reporting** for department education
- Enables management to **see data trends, proactively recognize issues, and implement timely solutions**

ZirMed's customizable dashboard functions as your organization's Charge Integrity command center, making it easy to zero in on pockets of unrealized revenue hidden in your own data.

Charge Integrity Applications:

- Missing Charges
- Coding Variances
- Overcharging Detection
- CDM Management
- DRG Anomaly Detection

Key Benefits:

Comprehensive Dashboards

- In-depth charge analysis
- Recovery revenue statistics
- Compliance risk analysis

Proactive Management

- Charge timeliness
- Charge fluctuations
- Procedure fluctuations
- Rev Code fluctuations
- Revenue projections
- Charge composition by patient
- Charge recovery performance

Operational Benefits

- Uncovers charge leakage trends
- Drives proactive improvements
- Provides ICD-10 safety net
- Provides HIS upgrade baseline
